

## Blinds and Vents

In-glazed blinds and 'through frame trickle vents' are the most popular choices from our options for blinds and ventilation.

In-glazed blinds are installed into a 28mm glazed unit. Operated from the inside by a pull cord and attached magnetic mechanism.

Slat colours:	White	Cream	Silver
Cord colours:	White	Black	Grey
Mechanism colour:	White	Grey	Translucent

NB: Battery operated electric blinds are also available

'Through frame trickle vents' are available for ventilation when required. The positioning of the vents depends upon the system that is chosen, the above image shows them in an extension section on an SFK70 System.

Standard colours: White / Black (RAL9005) / Silver (EV1)
